LANDSCAPES

Vast, ancient and majestic – the landscapes of Western Australia are filled with rich colours and fascinating forms. From rugged ranges to contrasting coastlines, the diversity is breathtaking.

FORMS AND COMPOSITION

Colour is a key element of landscape photography. The way we use colour can create a mood and tell a story. In this section, we explore the use of colour in landscape photography, from the warm tones of a sunset to the cool blues of a winter sky. We also look at how composition can be used to create a sense of depth and scale in a landscape photograph.

How we can help you.

We have the skills, combined with the latest technology and materials, to handle the projects that we have committed to do.

We can help with any size project from design, printing, and the fabrication to finish. But what all our projects have in common is the way we work with our client to help them reach their ideal outcome.

At Beyond Solution, our focus is to put you first. From the first introduction to the installation and assistance with future projects. Our team has more than 30 years of knowledge in the industry, not to mention generational experience.

By sharing our knowledge, product range and manufacturing capabilities, we strive to provide you with the very best solution for your needs.

We are Beyond Solution

Here at Beyond Solution, we have a major commitment to produce long lasting, top tier, quality products. We have an extremely dedicated and experienced team, that all share a similar trait in having a personalised, committed approach to meet our client's needs.

We offer a full range of signage with our high-quality print solutions. How?

- Having a team of talented signage and print specialists.
- Sourcing, securing and applying the latest, most efficient eco-friendly digital equipment.
- Monitoring and keeping ahead of the latest manufacturing trends.
- Innovating, solving your problems and thinking outside of the box to exceed your expectations.

What we do

Having access to the latest machinery, combined with the experience communication and knowledge from our trained professionals gives us the cutting edge opportunity to out-perform competition and deliver incredible results.

We pride ourselves on being able to help with any sized project. From design, printing, fabrication to finish/installation. One trait each project shares is the communication we provide our valued clients to ensure we reach your ideal outcome.

A personalized approach

Our team of professionals work extremely hard to ensure you not only receive your products, but that it's delivered on time and to budget.

Planning and project management

Successful projects always have one thing in common- Effective planning, communication and project management. Our project managers deliver end-to-end support. From site surveys, measurements to drawings and assessing product options to meet your budget. Even after completion of the project, we include post site inspections to ensure our promise to you is insured. As a team ethic, we pride ourselves in assisting beyond the current and/or completed project. This entails procuring new and exciting projects you may have in the future that Beyond Solution can assist with.

Design

Our graphic designers help bring your concepts to life. Whether you have brand guidelines that are to be strictly abided by, or you have a concept you'd like to bring to life. Our goal is to always deliver designs that are effective and fit for purpose.

Signage Manufacturing

Our in-house manufacturing allows us control over quality, costs and ensuring confidently we are consistently meeting deadlines. Heavily investing in the top tier of machinery, including cutting equipment, helps us guarantee the optimal results that is to be expected.

EAGLES SNOOP TO TAKE THE PRIZE

In front of 25,000 spectators, Gentry started the game strongly by catching a long punt and by the middle of the second quarter.

Just before the half-time siren, Gentry took a punt from the edge of Tony Stewart and the crowd. The Eagles scored the coup in 10 points.

In the second half the Eagles looked to give the Cowboys' fans an early hot Frodo-scaping.

IT'S A GREAT DAY FOR THE FUTURE DEVELOPMENT OF THE FC. THAT'S THE BEST NEWS WE'VE HEARD THE YEAR OF THE.

THE SEASON FINISHES LAST YEAR'S GAME FOR THE FUTURE AND THE BEST NEWS WE'VE HEARD.

BY THE WAY, WE'VE HEARD...

Our core services

Signage

Advertising is ever-changing and dependent on how you market your business. We offer hard and soft signage that is eye-catching. We offer options that can showcase your product or business and allow them to be seen in the market.

We commit to producing products of exceptional quality and durability with vibrant images that exceed market expectations.

Display systems

We can produce displays, used internally or externally to showcase your product. Book a time to meet and sit down with us if you have a specific display in mind.

With our dedicated team of professionals, we can produce customized displays to be used at special events or for commercial purposes in your business. We have a team that has vast experience in exhibition displays and have the knowledge to bring your ideas to fruition.

Large format

We have the latest technology to produce outstanding large format signs, from banners of various shapes and materials, to specialised signs that are laser etched or illuminated.

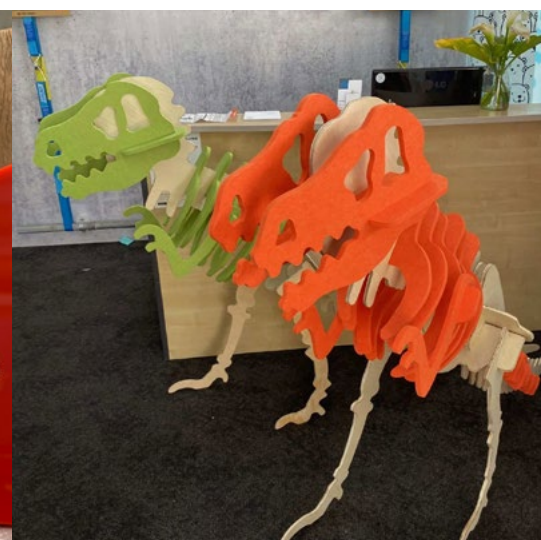

Examples of our work are all around, ranging from commercial building signage, advertising billboards, wall or window graphics, exhibition displays, and event signage, which are just a few of the things that we have been producing.

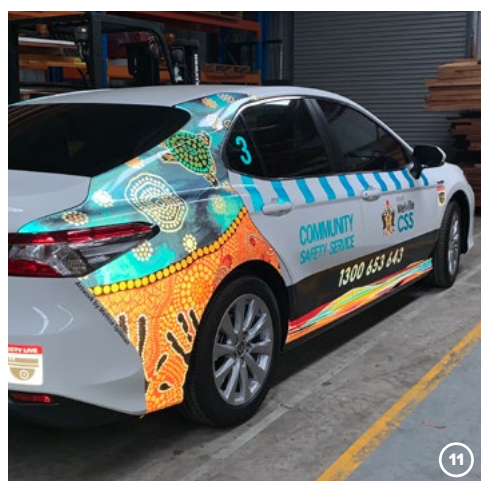

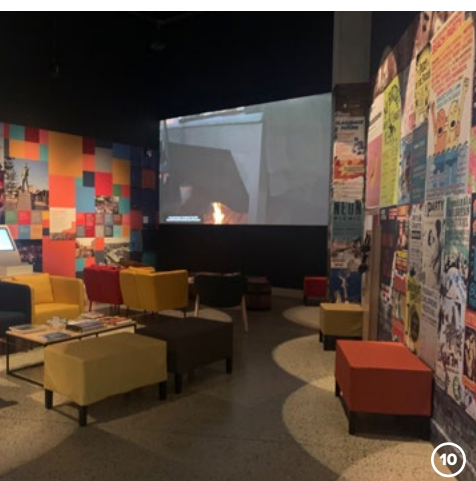

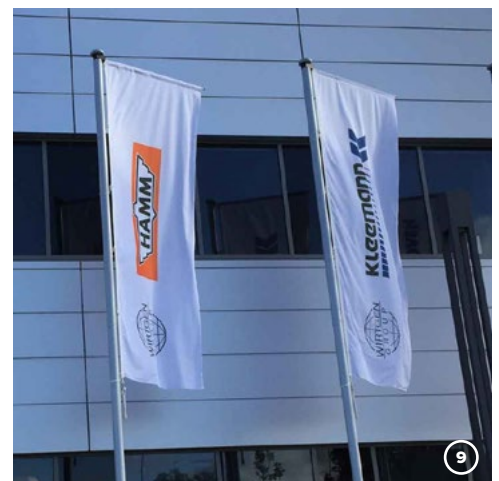

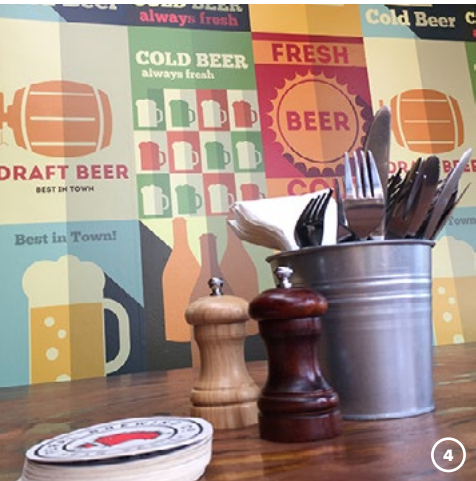

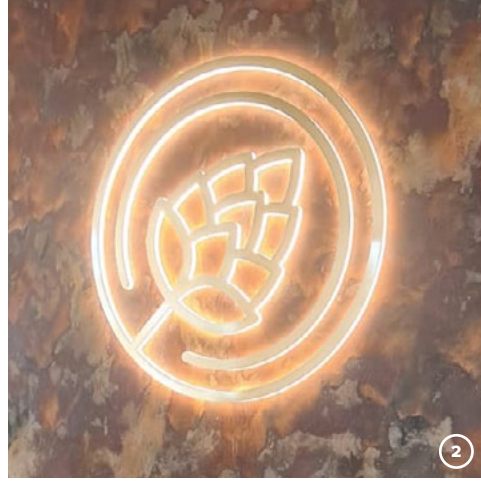

Specialised

We can put together a range of signage that would compliment and promote your event, product, or business. We can become your "one-stop-shop" advising you on what may be your best solutions and how they can be used best.

This includes our team of specialist installers, making sure that the signage is installed correctly, ensuring longevity to match the product. We can even create 3D extruded signage for the extra impact or illuminated signage to make sure it can be used to display in darker environments.

1. A creative mind and a skill-set to boot. This piece displays both our in house printing and fabrication abilities. 2. A beautiful display of how we can utilize acrylic and LEDs for a warm, bright side-lit finish. 3. We've got you and your walls covered with our commercial and residential wall-graphics. 4. Creatively assisting with our hospitality friends. Customizable or repetitive motifs! It's your call. 5. Utilization of our Troctec engraver. Precision, accuracy and a detailed finish. Not just subject to wood either! 6. Safety is important. Abiding by Australian standards and traffic management regulations, we can assist. Whether it be for an office or mine-site. 7. Partial car wraps. This image displays you don't need your entire car wrapped to get the message across. Spot graphics can do the trick too! 8. Large format abilities, fabrication and back-lit glows! T4 are definitely standing out from their competitors. 9. It doesn't stop there! Customized flags, banners you name it. We can even insert some eyelets for easy installation if needed. 10. Deck out your home theater or business office with unique designs/fun facts/your favorite movie icons. Taking up that extra wall space in fine fashion. 11. An extra bit of 'oomf' with our reflective vinyl, making this certain council car stand out far beyond the rest. 12. Frosted glass, using a water jet to achieve stand-offs to get an 'executive' feel. Which we are also able to directly print to.

Our credentials

Our reputation has been built on the foundation of listening to our clients' needs, addressing problems and ultimately, coming to a solution which exceeds expectation. This includes post-site visits and on-going communication to display our commitment and professionalism to the cause.

Our open and collaborative process, from consultation through to project management, gives you, our client peace of mind that their project is in safe, professional and reliable hands.

Our history

From two machines in 2017, Beyond Solution has outperformed its competition with quality and long lasting products. With an environmental edge that sets it apart, we now have a warehouse of top of the line machines that are printing around the clock.

Our Ethics

At Beyond Solution, our commitment to safety and quality is never gone overlooked and is always our priority.

Safety

We put the safety and health of our team, clients and the public above all else. We have implemented procedures from how to trim vinyl, operate machinery to VOCs, making sure that every risk is minimized or eliminated completely.

Since 2019, we have proudly created an environment in which is green and non-toxic for our production members. As all machines we've invested in and the material they use, are completely harmless to the environment.

Quality

Our manufacturing and installation professionals adhere to strict, documented quality procedures to ensure we provide the paramount experience and quality that our valued clients deserve.

AS 1319:1994

Australian Standard Signage

Australian Standard Signage consists of six official safety signs which you can see below.

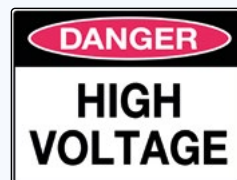

Mandatory signs

Indication that an instruction must be carried out. Symbolically, a blue circle with a white background. Generally utilized in pictographs.

Prohibition Signs

Indication that an action or activity is not prohibited. The symbolic shape is a red circle with a diagonal slash through it.

Warning

Warns of a hazard or a hazardous condition that is not likely to be life-threatening. Symbolic shape is black text with a yellow background.

Danger Signs

Danger signs warn of a particular hazard that is likely to be life-threatening. Symbolic shape is the word DANGER in white on a red oval surrounded by a black rectangle.

Emergency Information

Indication of, or direction to, emergency related facilities such as exits, safety equipment and/or first aid facilities. These are green and the text is white.

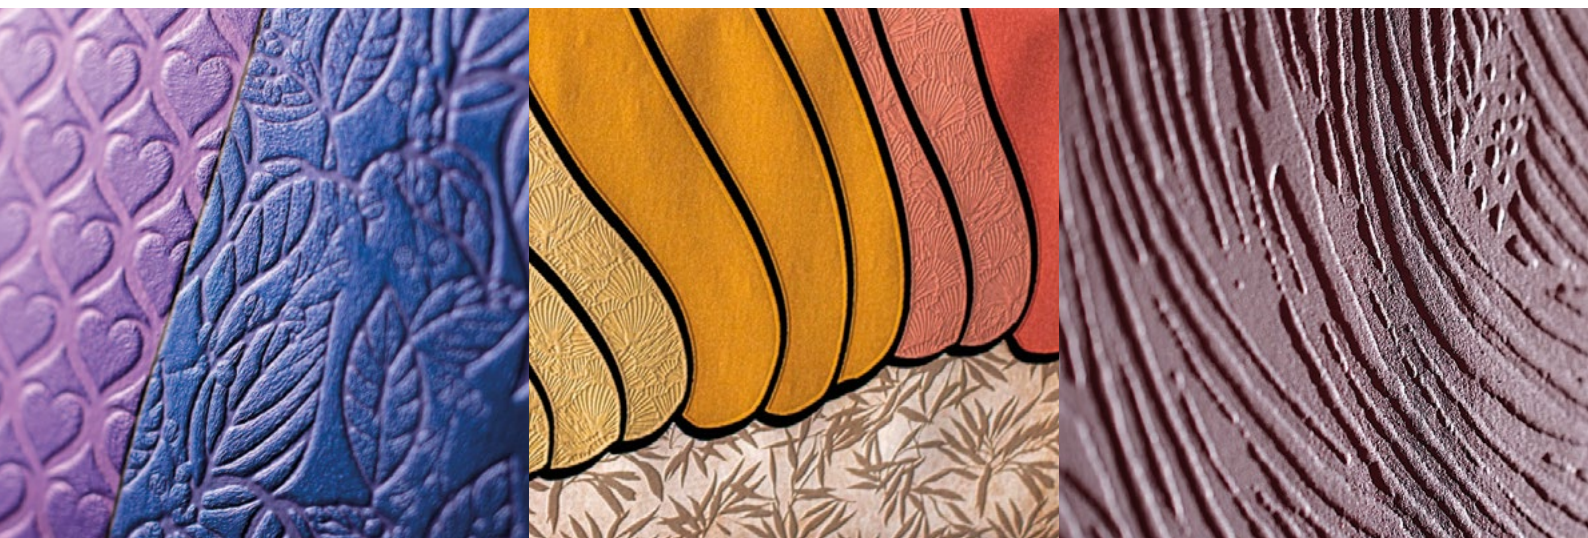

Fire signs

Advocation of the localization of fire alarms and fire-fighting facilities. The background is red and text/pictograph is white.

Dimense 3D

This pioneering technology makes it possible to print unique embossing at the same time as the item is digitally printed at virtually any size and without repeating the embossing pattern. So structure and motif can be perfectly matched to each other, or the structure may be completely different than the picture itself – it all depends on the designer's creativity.

Our equipment

To provide some insight on the machinery mentioned previously, below are some of our top tier machines that provide the utmost paramount quality products.

HP Latex R1000

Flatbed Printer with the latest ink technology. This machine is UL ECOLOGO and GREENGUARD GOLD Certified.

Trotec Laser Machine

Our state of the art high speed and high quality Swiss made laser cutting and etching machine, provide high quality image etching and clean polish cuts with acrylic.

HP Latex 335 & HP Latex L28500

Latex ink technology roll to roll printer with UL GREENGUARD GOLD Certified.

Dimense 3D Structured Printer

Acquiring the 1st of these machines in Australia, printing 15 to 20 square meters per hour. This 3D embossed wallpaper printer provides amazing, quality finishes suitable for both residential and commercial projects.

Texcel 2x4 CNC Machine

Our large table size CNC machine has the capability to cut most substrates up to 2m x 4m.

Signage Installation

At the present time, we currently run 3 installation teams, who are fully trained, licensed and equipped to handle large and small installation projects. Completely abiding by safety, professionalism and technical procedures and guidelines.

Signage maintenance

Once signs are installed. Ongoing maintenance procedures and programmes ensure that your investment in your product is protected, and they continue provide the product is maintaining the job required of itself. We can also help provide repairs and general maintenance during and after hours.

Digital Printing

We make sure to continuously liaise with our respected suppliers for new products, hardware, consumables and machinery to ensure we're not behind the curve.

Support Services

At any given time, we are more than happy to assist with any enquiries you may have. You can reach out by text, email or ringing the office and we'll do our best to help in any way we can.

Our Sustainability plan

We use latex inks in our printers that are non-hazardous and made up of 70% water. This means that all our printed materials can be displayed anywhere, without fears of environmental or health issues.

Even better, is that the prints are also scratch and water resistant. The materials we use are in line with environmental guidelines and all waste is carefully considered and appropriately recycled.

Image: Going beyond car wraps and utilizing our team's skill-set to customize wrap a very friendly robot for our friends at Sodexo.
